### Technical data

Unit space area	1.85 x 1.85 m
Jumping area	0.98 m <sup>2</sup>
Safety space area	4.29 x 4.29 m
Height of unit	0.00 m
Max. free drop height	0.90 m
Age range	3+
Number of users	1
Heaviest component	230 kg
Total weight	230 kg
Assembly time	1.00 hour
Installers	2-3 persons
Foundations	none

## **Tender specification**

Jumping device describes an angle of 90 degrees - unit space area 1.85 x 1.85 m, effective jumping area 0.98 m<sup>2</sup>. Frame made of durable, hot-dip galvanized steel construction.

Closed jumping surface, made of dyed through polyamide wing lamellas with conical seat joints to reduce the load on the steel wire ropes and with nubby GRIPTAQ® surface for optimal grip in all directions of movement.

Including 40 highly robust DURAPTEQ® screw plate tension springs with noise-reducing plain bearing sleeves.

Special version without fall protection plates intended for installation in molded fall protection.

Top steel-plates with an enlarged surface and welded-on security round rod ø 8 mm on the inside edge. Optimized for the coating with EPDM fall protection granulate.

Height of device: 400 mm

Please note – the installation depth depends on the height of the EPDM fall protection granulate structure. The requirements of the DIN EN 1176 must be met for a maximum free fall height of 900 mm.

Foundations are not required - the jumping device is completely assembled at the factory and delivered ready for installation.

Maintenance and cleaning of the interior can be done quickly and easily via the jump mat. Hook notches on the DURAPTEQ® springs make work easier. Installation and operating costs are minimized!

### **Selectable colors:**

Jump mat - available in the standard colors Persidion black, Borneo green, Alpaca gray, Pearl blackberry, Bengal red, Jakarta orange, Mocha brown, Bali yellow, Lapis blue and Sand beige. Individual colors available on request.
